What is Content Fusion

Web Collaboration Solution for any XML Documentation Review Workflow

Life before Content Fusion

Content Fusion workflows

Collaboration scenarios

- Initiated by Content Authors
 - Send DITA files to be reviewed
 - Send arbitrary XML files to be reviewed
 - Send PDF file to be reviewed, collect feedback in Content Fusion.
- Initiated by SMEs
 - Create content drafts in a structured format
 - Use templates to provide technical data to Content Authors

DITA Incremental Review

- A new feature is added to the product => new & updated topics in the docs

DITA Incremental Review - v1

1. Create a PDF / WebHelp

- Challenges

- How to generate a PDF?
- Will it look like the “final” one?
- Do I need to save to the CMS first?
- We use only WebHelp, where should I put the HTML files?
- What if the email is forwarded to someone which isn't supposed to read it?

DITA Incremental Review - v1

1. Create a PDF / WebHelp
2. Identify the touched pages (... among the 2000 of them)

DITA Incremental Review - v1

1. Create a PDF / WebHelp
2. Identify the touched pages
3. Discuss over email

Change suggestion - SME's view

WebHelp Content:

Oxygen XML Web Author includes a **Tags Display Mode** option that you can use to display the XML tags directly in the document. To access this option, select **Preferences** from the **More drop-down menu**. You can choose from the following tag modes: **Full Tags with Attributes**, **Full Tags**, **Block Tags**, **Inline Tags**, **Partial Tags**, or **No Tags**.

Update suggestion: We updated the product UI and this paragraph should be changed to

Oxygen XML Web Author makes it simple to create XML content without thinking about structure. However, sometimes, it is important to make sure the structure of the document reflects your intention. To see the structure of the document you can use the **Structure Display Mode** dropdown on the toolbar and choose one of the following modes: **Full Tags with Attributes**, **Full Tags**, **Block Tags**, **Inline Tags**, **Partial Tags**, or **No Tags**.

To see the structure of the document you can use the **Structure Display Mode** dropdown on the toolbar and choose one of the following modes: **Full Tags with Attributes, Full Tags, Block Tags, Inline Tags, Partial Tags, or No Tags.**

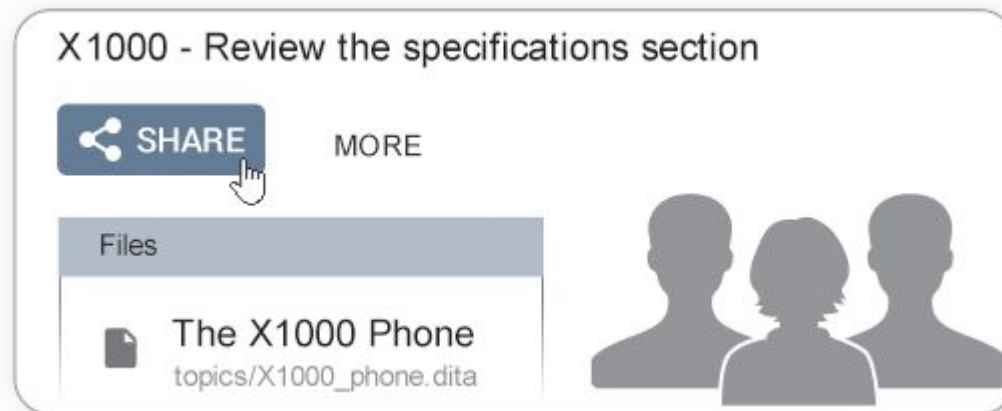

DITA Incremental Review - v2

1. Create a review task with the touched topics

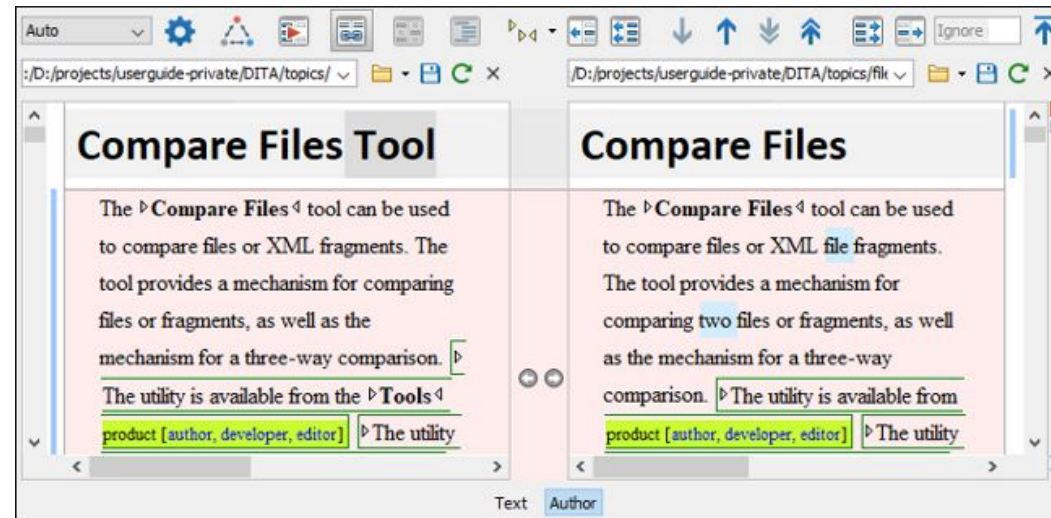

DITA Incremental Review - v2

1. Create a review task with the touched topics
 - a. They are already opened in Oxygen XML Editor
2. Share the link with SMEs

DITA Incremental Review - v2

1. Create a review task with the touched topics
 - a. They are already opened in Oxygen XML Editor
2. Share the link with SME
3. Integrate the feedback

DITA Approval Review with CF

- Workflow steps
 - Add all the files in the map to a review task
 - Configure the DITA context: map and filter
 - Iterate on content until everyone approves
 - Save the content in the CMS

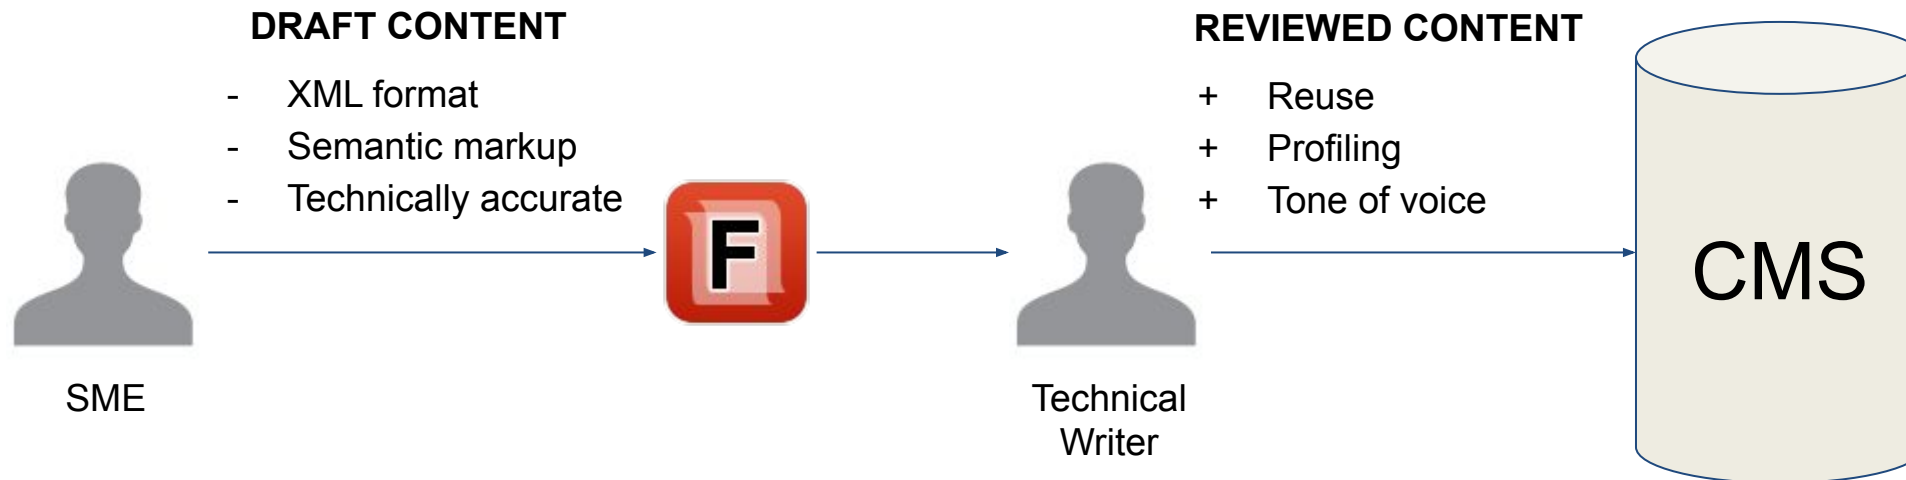

Approval Review on PDF

1. Approver reads the content
 2. (optional) Approver expresses concerns
 3. (optional) Author makes corrections
- Use a PDF for Step 1.
 - Step 2.
 - Sometimes there is only Step 1.
 - To express concerns, Approver opens Content Fusion with one click to add comments and make suggestions.
 - Step 3.
 - Author sees comments and suggestions right in the content.

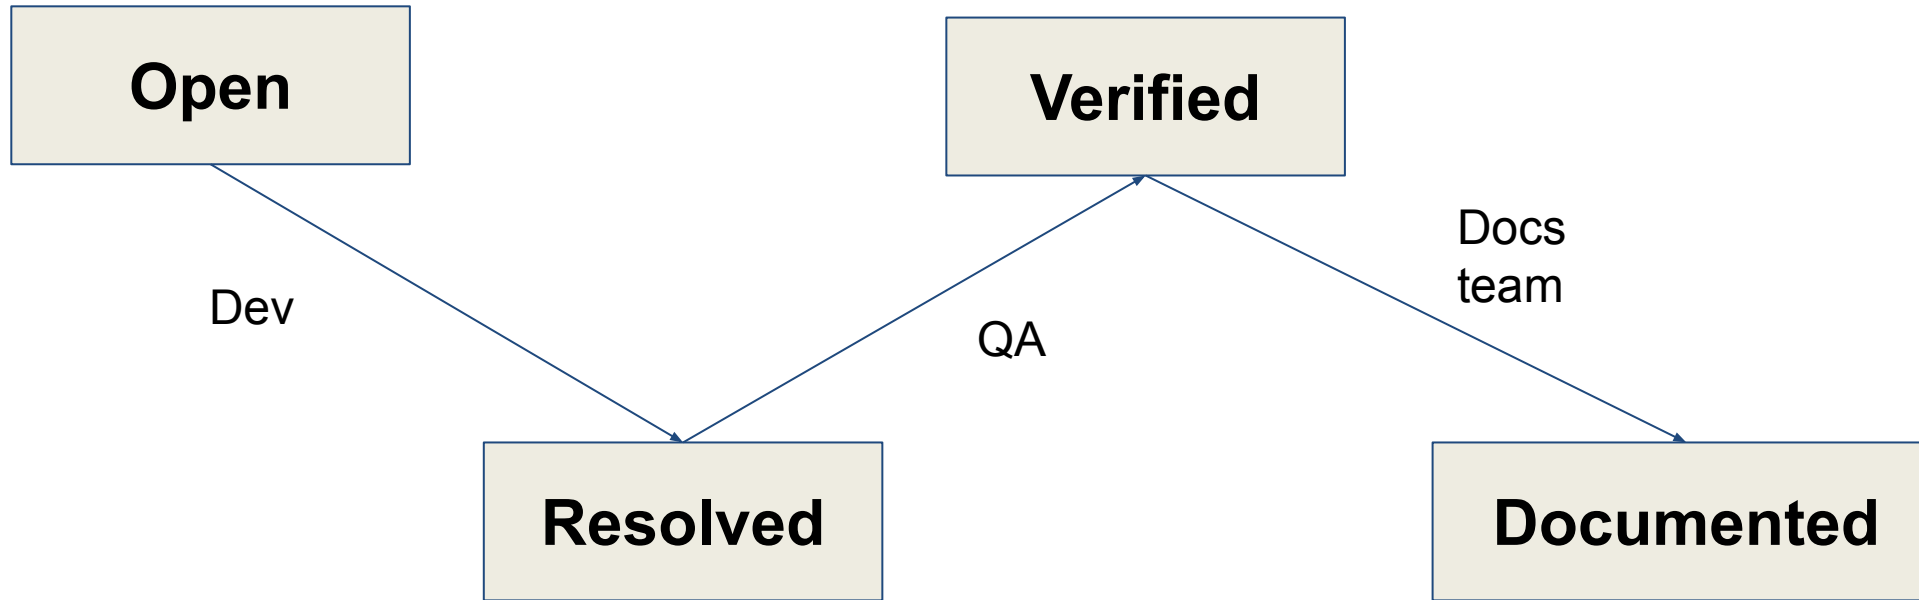

Other XML vocabularies

- Content Fusion supports also DocBook, TEI, XHTML out-of-the-box
 - ... and any other vocabulary with a suitable framework
- What's new
 - XML files are hard to share because they are inter-linked
 - Content Fusion automatically detects refs and adds them to the task

SME's initiated workflows

Issue Lifecycle

- Implemented
- Explained for QA and Docs

Issue documentation

- Is **required** also for a proper QA
- Contains **rich content** - code, tables, icons, notes etc
- Can be lengthy - need for a comfortable editor
- Is **written by a developer** - not a polished piece of documentation

Use Content Fusion to create this draft!

SME's initiated workflows

- New feature/product documentation can be drafted by SMEs
- Support specialists can create topics to address user questions
- Anyone can create a knowledge base article

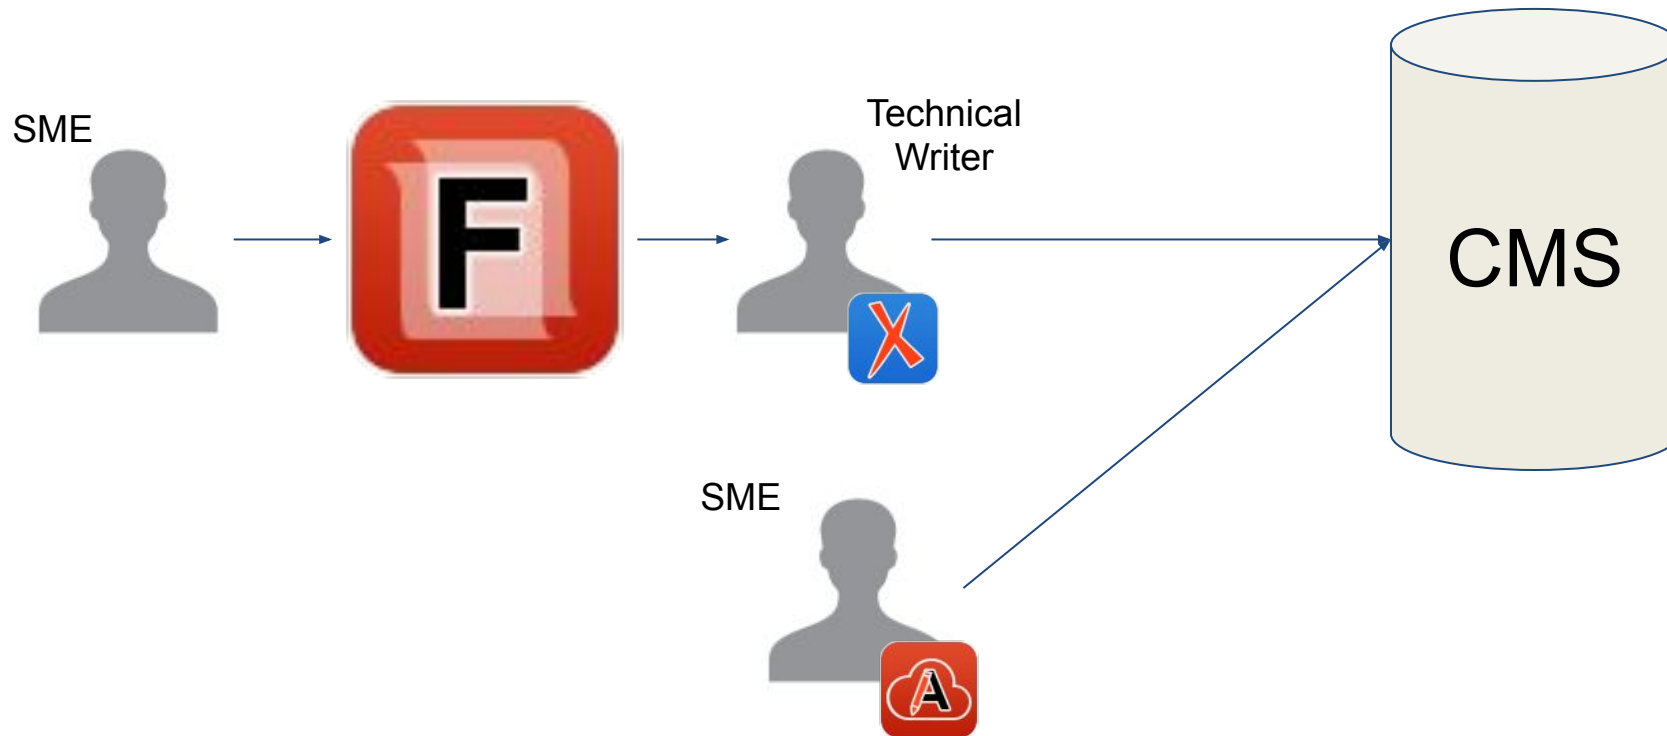

Content templates

- Touristic guide
- Dictionary entries
- Datasheets

A screenshot of a content template form. The form is light yellow and contains several fields and options. At the top left, there is a "Title" field with a placeholder "address" below it. Below the title field is a large text area with the instruction "Write a description. A paragraph should be sufficient" and a small folder icon. Below the text area is a "caption" field with the placeholder "[Empty]". To the right of the text area, there is a "Facilities:" label followed by "[Empty]". On the right side of the form, there are several dropdown menus and checkboxes. The "Type:" dropdown is at the top, followed by the "Cost:" dropdown. Below these are three checkboxes labeled "Boat", "Car", and "Bus". At the bottom right, there are three icons with corresponding text: a phone icon for "Phone number (e.g. +1-541-754-3010)", an envelope icon for "Email address", and a clock icon for "Mention the weather conditions that can affect the opening hours". At the very bottom right of the form, there are two red buttons labeled "Remove" and "Add".

Content Fusion & Web Author

- With Content Fusion, the technical author is a gatekeeper in Web Author SMEs can save content directly in the CMS

Content Fusion & Web Author

- With Web Author, more collaboration scenarios are enabled, e.g.
 - Propose a correction to a published document
 - Review only the updated parts of a topic

A screenshot of the Oxygen Content Author Guide web page. The page has a light blue header with the breadcrumb "Home / Content Author Guide" and navigation icons. A left sidebar contains a menu with "Overview", "Content Author Guide" (expanded), "Quick Start Guide: Content Author", and "Account Management". The main content area is titled "Content Author Guide" with an "Edit online" link. The text describes the role of a Content Author and the review process.

Overview

Content Author Guide

Quick Start Guide: Content Author

Account Management

The **Content Author** refers to a user who creates documentation in *Oxygen XML Editor* or *Oxygen XML Author*. They will have access to the **Content Fusion Tasks Manager** view where they can create a task to upload files that need to be reviewed by others. The **Content Author** then simply shares a link to the task with one or more **Reviewers**.

During the review process, the **Content Author** and all of the **Reviewers** can communicate directly in the Oxygen Content Fusion interface and once the process is finished, the **Content Author** has a convenient built-in *Merge* tool to integrate all the changes back into *Oxygen XML Editor* or *Oxygen XML Author*.

Content Fusion Future plans

- Ability to share a task with a specific reviewers
- Due Date setting for each task
- Task-level version history
- Comment-only mode
- SMEs ability to propose changes on content
- Send only the updated parts of a topic for review

THANK YOU!
